

HGP01-80 LDM HIGH GAIN GLASS PRISM REFLECTOR

- **Laser Distance Meter High Gain Plastic Prism Reflector**
- **For use with the ELDP and MDHD Family of Laser Distance Meters.**
- **Used in conjunction with high gain reflective foil to increase reflection efficiency.**
- **Overall Size: 70 mm (2.76") Dia. x 60mm (2.36") Long**

Features

- High Performance Glass Prism Reflector
- The reflection efficiency is increased by a factor of eight compared to a standard high performance reflector.
- For Use with ELDP & MDHD Family of Laser Distance Meters

ELDP & MDHD Product Family

- ELDP10 for measurements to a reflector panel at distances over 80M or to natural surfaces up to 20M.
- MDHD100 for measurements to a reflector panel at distances up to 800M or to natural surfaces up to 155M.
- MDHD600 for measurements to a reflector panel at distances up to 600M & Glass Prism reflectors up to 1200M.

Typical Applications

- Crane applications in areas where a reliable High Gain Reflector is required.
- Any Laser Distance Meter application in areas where a High Gain Reflector is required.

Description

The HGP01-80 Laser Distance Meter High Performance Glass Prism Reflector increases the reflection efficiency by a factor of eight compared to a standard high performance reflector. The HGP01-80 is used in conjunction with High Gain Reflective Foil to enhance the overall capabilities in applications requiring greater range. The Reflector size is 70 mm (2.76") Dia. x 60 mm (2.36") Long and is provided with an M4 threaded insert in the back.
